# THE CLASSIC

## *THE WORKING POLYTUNNEL*

The Polyeco Classic is a greenhouse with an extremely strong design. Its frame is made from galvanised steel omega profiles, which provide robust support for the structure. The arches are 0.7m apart, and it also features internal support bars that provide resistance against snow and side wind. These features make the Polyeco Classic the strongest greenhouse of the two, and it is suitable for use in areas with heavy snowfall and strong winds.

**EXTREME  
WIND

# THE SPADE

## CONTEMPORARY DESIGN

Introducing a contemporary, compact, and robust greenhouse. This greenhouse offers a protected environment, surpassing what an open garden can provide. Designed to seamlessly blend into most garden settings, this greenhouse significantly extends the gardening season. Stepping into this special haven evokes a sense of wonder, and you'll eagerly anticipate each visit as you tend to and nurture your plants—or simply relish moments of tranquility.

# THE HOUSE

## TRADITIONAL LOOK

Polyeco House boasts a traditional design that combines functionality with aesthetic appeal. Its sleek structure enhances the overall beauty of your garden, creating a harmonious blend of nature and technology. The greenhouse is constructed using high-quality, durable materials, ensuring longevity and resistance to the elements.

# THE TUBE

## UNOBSTRUCTED SPACE

The backbone of the Polyeco Tube Polytunnel is its galvanized steel tube frame. This robust construction ensures durability, even in challenging weather conditions. Say goodbye to internal support bars obstructing your gardening space. The Polyeco Tube Polytunnel boasts a unique design that eliminates the need for internal support bars. This maximizes the usable area, allowing you to make the most of the available space for planting, sowing, and tending to your crops. Whether you have a small backyard or a cozy garden nestled between buildings, the Polyeco Tube Polytunnel is tailor-made for sheltered spaces

### GALVANISED STEEL TUBE FRAME
